Wilmington, NC 28481

Professional Installation
by local Greenfield Dealers.

Creative solutions to exceed the
homeowners expectations.

Plug-in ATS connection.

Classified as "portable generator".

Water cooled design utilizes
homeowners pool, irrigation, well,
city, pond or sea water to cool the
engine and exhaust.

Remote radiator option available
if there is no water source.

Emergency run switch
overrides controls to ensure
operation in catastrophic
events.

Fiberglass enclosure
insures the corrosive salt
air will not enter the engine
compartment. Also helps to
blend into the homeowners
overall design concept.
